- **Compression glove that compresses tissue to control the development of oedema**
- **Models for left or right hand with 3 sizes per hand**

This Lycra compression glove gently compress the tissue to control the development of oedema. They help prevent certain joint pains for patients with arthritis. The fabric used allows air to circulate and does not cause overheating.

Compression models for the left or right hand, available in three sizes per model.

Measure the circumference of the base of the hand at the knuckles to choose the correct size :
- Small : 18 to 20 cm
- Medium : 20 to 23 cm
- Large : 23 to 25 cm
Compression 15 to 25 mm Hg

Care instructions : Machine wash on a cold cycle (delicate cycle). Dry flat in the open air. If there is excess thread, do not cut it to prevent the seam from fraying.

Variantes :
- Wide right hand
- Right hand medium
- Right hand small
- Large left hand
- Left hand medium
- Left hand small
