

Medelert

- 817135

- **New : radio-controlled clock**

The Medelert is a complete tool for the safe sequencing of medication. It is particularly recommended for people with memory problems. It is fully automatic, and only opens when it is time to take the medication. It delivers only the contents of the programmed compartment, the user does not have access to the others. It has 6 audible alarms and a visual alarm on the lid (up to 30 mins continuously). It is easy to program and allows you to program 1 week with 4 shots per day or 2 weeks with 2 shots per day or 28 days for 1 single daily shot.

Operates on 4 AA batteries (included).

1 year warranty.

Large 19 cm diameter.
