

Heating pad with cherry pits

- Heating pad filled with cherry pits to store heat quickly and release it over a long period of time.
- Ultra-soft microfibre coating

Our cushions are filled with cherry pits. They store heat very quickly and release it slowly, so that you can enjoy the benefits of heat longer. The muscular relaxation caused by the gentle, deep heat will help to soothe the pain associated with daily fatigue.

Microwave heating exclusively.

Filled with 100% cherry pits and wrapped in ultra-soft microfibre polyester.

Green colour.
