

Powerstroll S Drive

- S Drive - 824014
- S Drive XL - 824015

- **2 models according to body size and power**
- **Full video available below**

This motors can be used to motorise a manual wheelchair and are removable. They are suitable for most manual wheelchairs with a seat width of between 42 and 51 cm.

We offer 2 different models :

- The **S Drive version** has 2 wheels and motorises the wheelchair up to 6.5 km/h. Weight with battery 19.2 kg. Its unique system makes it easy to be installed and removed in a few seconds. Control with speed control and reverse. Powerful 150W motorisation with 24V battery. Autonomy 16 kms at a maximum weight of 135 kg.

- The **S Drive version XL** allows for use with strong people. Powerful 200W motorisation with 24V battery. Autonomy 16 kms with a maximum weight of 180 kg.
Optional : The Powerstroll extension bar allows the S Drive XL to be fitted to chairs with a seat width of 50 to 60 cm.

All models are supplied complete with fixing system, batteries, control and lifting strap.

2 year guarantee excluding wearing parts, by replacement and shipment of spare parts.

6 month warranty on electrical or motorised products. Claims will be accepted if an electronic malfunction resulting from abnormal wear and tear occurs within 6 months (motor, charger, batteries, cables, fuses, controller, joystick, etc.).
