

Danchair adaptive high chair

- 821089

- **Chair with high adjustment capabilities**
- **Ultra-stable structure**

The Danchair high chair can hold a child in complete safety and to make it evolve during its growth, as it offers great adjustment capabilities. The seat and the tray can be set at different levels (14 different positions) by varying the seat height and the height between the seat and the tray. The backrest is equipped with a wooden railing and a strap to prevent the child from sliding forward. The textile strap is removable and adjustable, and clips into place.

Ultra-stable solid beech frame.
Maximum supported weight 140 kg
Dimensions: width 47 x depth 54 x height 81 cm.
Weight: 6 kg
