- 75 cm - Kit 5 - 825097

- **New pre-assembled kits**
- **Fully adaptable to all needs**
- **Sloped ramp surface, platform, and angle bracket available**

Excellent Systems' have received numerous awards and distinctions for their ease of installation and precise adaptation for all needs. The kits consist of parts to be assembled from PELD or HDPE polyethylene, an environmentally friendly and recyclable material. The top surface is non-slip for maximum safety.
Once installed, the ramp can be used permanently or occasionally, as it is easily removable. Do not let thresholds and steps prevent the free movement of walkers or wheelchairs.
The ramp fits flush with the obstacle, so it does not interfere with the use of doors. It can support a weight of 2 tons, which allows it to be used with vehicles. Non-toxic material, washable with standard detergents.

5 kits available depending on the desired height, with 2 widths available.

Kit 1 :
Dimensions : Width 75 or 100 cm x Height 1.8 to 5.5 cm x Depth 25 cm.
