

Jump motor skills kit

- 405004

- **Objective : to create a small, versatile speed circuit**
- **100% Made in France**

The jump kit allows users to build two types of circuits : either a hurdle course at different heights with hoops on the ground for jumping with both feet or running, or a slalom-style balance course where children must either complete the course without touching the ground or jump through the hoops scattered on the ground.

The kit includes : 1 set of 12 bricks in 4 different colours, 6 plastic markers, 120 cm long, and 6 flat hoops, 60 cm in diameter.
