

Anti-slip chair cushion

- The markings show you the way to place it on the armchair.
- Waterproof and disinfectable chair cushion
- French manufacture

We have re-developed a cushion that allows a seated person to sit upright without sliding forward again. This cushion is made from a special fabric that prevents it from sliding back and forth. The upper side is made of breathable fabric with an indication of the correct direction to sit on and the underside is made of non-slip fabric. The whole unit is fleece-lined for greater seating comfort.

Generous dimensions for easy handling when sitting on it: width 41 x depth 41 cm. Thickness 5 mm $\,$
