(On restock - Available from 20/12/2024)

- Supports and wedges the patient's back
- Prevents the development of pressure sores in the nursing phases.
- Material from the latest innovations
- French manufacture

Our PositPro cushions benefit from the technigel fibre, which gives unequalled comfort for the patient. It surpasses the comfort performance of current polyester fibres, is lighter and, above all, has a memory effect. It provides optimal cushioning to relieve pressure on the support points. They are fitted with the Steritex removable cover, the most resistant polyurethane on the market. Innovative, breathable and waterproof coating on a bi-elastic knitted base. Ideal for decontamination in the community and adapted to the most stringent requirements in environments at risk of contamination. Its resistance to maintenance makes Steritex a product that is highly appreciated by hygiene services. Washable at 90°C. Resistant to chlorine and autoclave.

Very soft and comfortable to the touch. Underwrap for 100% cotton fibre.

Cushion in the shape of a half-moon, holds and supports the patient's back when sitting in an armchair or lying in bed in a supine position at 30°C.

The use of the cushion relieves and distributes the patient's pressure points and prevents the development of pressure sores during the nursing phases.

Dimensions: 190 x 30 cm.

Choice of 2 colours: taupe grey or aubergine.

Variantes :

- Aubergine
- Taupe colour
