- **Multifunctional positioning cushion: abdomen, hip, head or knee**
- **Material from the latest innovations**
- **Standard size or set of 2 small sizes**

Our PositPro cushions benefit from the technigel fibre, which gives unequalled comfort for the patient. It surpasses the comfort performance of current polyester fibres, is lighter and, above all, has a memory effect. It provides optimal cushioning to relieve pressure on the support points. They are fitted with the Steritex removable cover, the most resistant polyurethane on the market. Innovative, breathable and waterproof coating on a bi-elastic knitted base. Ideal for decontamination in the community and adapted to the most stringent requirements in environments at risk of contamination. Its resistance to maintenance makes Steritex a product that is highly appreciated by hygiene services. Washable at 90°C. Resistant to chlorine and autoclave.

Very soft and comfortable to the touch. Under-lining for 100% cotton fibre.

Multifunctional rectangle-shaped cushion. Holds and wedges the abdomen in a lateral decubitus position at 30°C. Relieves the heels in the dorsal decubitus position at 30°. Unloads the head as a pillow. Intervenes for the abduction of the knees and hips.

Standard dimensions: 55 x 40 cm.

Small size dimensions: 27 x 40 cm sold by 2.
