- **Helps to maintain the abdomen, avoid friction in the legs or ankles.**
- **Material from the latest innovations**
- **Standard or small size by 2**
- **French manufacture**

Our PositPro cushions benefit from the technigel fibre, which gives unequalled comfort for the patient. It surpasses the comfort performance of current polyester fibres, is lighter and, above all, has a memory effect. It provides optimal cushioning to relieve pressure on the support points. They are fitted with the Steritex removable cover, the most resistant polyurethane on the market. Innovative, breathable and waterproof coating on a bi-elastic knitted base. Ideal for decontamination in the community and adapted to the most stringent requirements in environments at risk of contamination. Its resistance to maintenance makes Steritex a product that is highly appreciated by hygiene services. Washable at 95°C. Resistant to chlorine and autoclave.

Very supple and comfortable to the touch. 100% cotton fibre underwrap.

Cushion in the shape of a cylinder. Holds and wedges the abdomen in a lateral decubitus position at 30°. To be used between the legs to prevent friction between the knees and thighs. For use around the ankles.

Standard size 55 x 18 cm
Small size: 30 x 18 cm sold in pairs.
