

PositPro abduction block

- Aubergine - 829082.A

- Grey - 829082

(On restock - Available from 22/04/2026)

- **Triangular cushion positioned between the legs to support the lower limbs.**
- **Material developed using the latest innovations.**

The PositPro cushions feature Technigel fibre, which provides unrivalled comfort for patients. It exceeds the comfort performance of current polyester fibres, is lighter and, above all, has a memory foam effect. It allows for optimal positioning to relieve pressure points.

The cushions are supplied with a removable Steritex cover, made from the most resistant polyurethane on the market. Innovative, ventilated and waterproof coating on a bi-elastic knitted base. Ideal for sanitizing in care homes and suitable for the strictest requirements in environments with a risk of contamination.

Its resistance to maintenance makes Steritex a product that is highly appreciated by hygiene services. Washable at 95°C. Resistant to chlorine and autoclaving.

Very soft and comfortable to the touch. 100% cotton fibre cover.

Triangular cushions that support and hold the lower limbs in abduction.

Positioned in the crotch, it prevents abnormal positions (knees, calves, thighs). The use of this cushion relieves and distributes the patient's pressure points and prevents the development of bedsores during nursing care.

Dimensions : 30 x 15 cm.
