

Jube Bed Bath

- 823035

- **A unique and very easy to implement system for washing the elderly or bedridden person.**

Our Jube bed tub consists of an extremely rigid and flat bed top with side panels that guarantee a perfect seal. The patient is first placed on the tray by rolling him up, then the side walls are put up, and the drain hose are attached. The Jube bed tub comes with a practical hand shower that can be connected directly to a washbasin or bathtub faucet. The long hose (11 metres) makes it very comfortable to use. Comes with a mattress and comfort pillow.

The large drainage canister has been designed to make the work of carers easier: it has a handle and is easy to roll up. It has a stopper that makes it easy to hang it on the bathtub and empty the water without effort.

Made of reinforced ABS.

Dimensions : Length. 175 x Width. 63 cm. Weight 8.6 kg (heaviest part: 5.8 kg).

Maximum supported weight 100 kg
