- Electrotherapy with 2 independent channels with the possibility of connecting up to 8 electrodes ;
- Two-phase symmetrical and compensated pulse generator: the amount of current flowing from the positive to the negative pole is equal and constant. This avoids the unpleasant thermal effect of the
polarisation possible with an uncompensated pulse generator;
- Digital keypad with simple and intuitive controls;
- Instructions on the current programme and remaining time provided directly on the display;
- Operation with internal rechargeable battery (extractable);
- Backlit display;
- Maximum intensity of 200 mApp;
- Medical device CE0476 certified.
