I-Tech Mio-Care Tens device

- 838093

- **Portable and rechargeable battery powered**

The new generation of Tens professional devices : portable, rechargeable battery-powered electrotherapy unit.

20 Tens programmes (conventional, endorphinic, powerful, anti-inflammatory, cervical, lumbosciatica, sprain, vascularisation, relaxant, haematoma, atrophy prevention, hand/wrist pain, foot stimulation, picondylitis, epithrochleitis, periarthritis, micro-current, stress incontinence, bladder incontinence.
- Electrotherapy with 2 independent channels with the possibility of connecting up to 8 electrodes ;
- Symmetrical biphasic and compensated pulse generator: the amount of current flowing through the positive and negative poles is equal and constant. This avoids the unpleasant thermal effect of possible polarisation with an uncompensated pulse generator:
- Digital keypad with simple and intuitive controls;
- Instructions on the current programme and remaining processing time provided directly on the screen;
- Operation with internal rechargeable battery (extractable);
- Backlit display;
- Maximum intensity of 200 mApp;
- Medical device CE0476 certified.

2-year warranty.
