- 75 cm - Kit 5 - 825108

- **New pre-assembled kits**
- **Can be adapted to your needs**
- **Inclined plane, platform and angle available**

Excellent Systems' kit railings have received numerous awards and distinctions for their ease of installation and their precise adaptation to your needs. The kits are made up of parts to be assembled in PELD or HDPE polyethylene, an ecological and recyclable product. The top is non-slip for ultra-safe use.

Once installed, the ramp can be used permanently or occasionally, as it is easily removable. No longer let thresholds and steps prevent the free movement of rollators or wheelchairs.

The ramp is flush with the obstacle, so it does not interfere with the use of doors. The ramp can withstand a weight of 2 tons, which allows it to be used with vehicles. Non-toxic material washable with usual detergents.

5 platform models available according to the desired height with 2 possible widths.

Platform 1 :

Dimensions: W 75 or 100 cm x H 3.6 to 5.2 cm x D 75 cm.

Platform 2 :

Dimensions: W 75 or 100 cm x H 7.2 to 8.8 cm x D 75 cm.
