Izidoor touchless door opener

- 837191

- **Health protection equipment**
- **Ready-to-install kit - no tools required**
- **Made in France**

Door opening device that does not require the use of hands, thus preventing the spread of bacteria or viruses, particularly in the event of a pandemic such as COVID.
The kit includes an 'actuator' fixed near the door block that activates a mechanism and, when activated, opens the handle block of any interior door model using the forearm or elbow.
The kit is ready to install with no tools required; adhesive fasteners are included.
Hygienic, contactless actuator made of antimicrobial plastic (standard 22196:2001).

Kit includes an actuator, 2 adhesive strips and a cleaning wipe.

Weight : 85 g.

Date d'impression : 31/10/2026
