- **Ramps for small thresholds, easy to install and clean**

Quickramps are made from a single piece measuring 100 cm wide and can be easily cut to fit the width of various thresholds. Installation is very simple. Either by simply using double-sided adhesive tape (quick tape), or by first attaching quick pads (4 for a width of 100 cm) and clipping the ramp onto them. The quick pads can be glued or screwed to the floor.

It is possible to choose from a range of heights to acquire the exact the passage height required
