

Acceo bath rail

- 812086

- The access bar can be positioned on the left or right of the step
- Mould resistant teak step

The Acceo access bar combines a step and a support to facilitate access to the bathtub for elderly people with reduced mobility. The set can be fixed to the edge of the bathtub without tools and offers excellent safety and stability.

The support can be placed on the left or right side of the step, depending on the layout of your bathroom.

Epoxy-coated steel frame and mould-resistant teak step.

Suitable for bath rims between 7.5 cm and 14 cm high.

Height : 106 cm. Handrail width : 33 cm.

Step dimensions : width 39 x depth 28 x height 24 cm.

Maximum user weight : 150 kg.

Date d'impression : 02/08/2025
