

Folding parallel walking bars - 3 metres

- Ideal for small spaces
- Folding bars which fold against the wall when not in use

Parallel walking rehabilitation bars with epoxy metal structure.

Anatomically shaped handrails in epoxy metal, height-adjustable with a telescopic system.

The star knobs (visible in the photos) have been replaced by ratchet handles, which are more robust. This system prevents the handrails from unscrewing or moving during use.

Width between handrails : 60 cm.

Base width : 70 cm.

Handrail height : 69 to 100 cm.

Length : 3 m.

Maximum user weight : 135 kg
