Set of 3 balance blocks

- 405061
(Disponible sous 30 jours)

This set for balance exercises for the elderly people helps improve body-space coordination and balance with three different blocks. Each interlocking element is made of a complex polyethylene and polyurethane foam of different densities.
The polyethylene layer prevents any risk of slipping.
Non-slip underside, available in three different colours.
PVC-coated jersey cover, 720 g/m², fire retardant (M2).

Dimensions of a single element : Length 65 x width 20 x height 14 cm.
Length of the three elements : 195 cm.

Date d'impression : 31/10/2026
