

Track Wheel

- Double fork - 875036

- Single arm - 875035

- Turn your wheelchair into a tricycle with surprising agility!
- Live a new experience of speed and freedom

The Track Wheel outdoor front wheel is the perfect companion for your trips around town, in the woods or on the beach: ultra-light, easy to attach and comfortable. The Track Wheel features a large 12" pneumatic wheel and an anti-float carbon fork. Its ultra-fast attachment system in 3 seconds and without tools allows to lift the front swivel wheels of the wheelchair and reduces the rolling resistance.

The Track Wheel is available in 2 models:

- The single arm model with an attachment system on the rigid footrest of the chair. Its carbon design makes it the lightest product on the market with only 2.6 kg.
- The double arm model with an attachment system for chairs with integrated fixed footrests. Lightweight carbon design: 4.5 kg.

The Track Wheel needs to be adjusted to the wheelchair in use, so that the attachment is ultra-fast in subsequent uses.

Single arm dimensions: L 65.8 x H 36 cm.

Double arm dimensions: L 55.4 x H 47,9 cm.

Variantes :

- Double fork
- Single arm
