Geemarc audio amplifier

- 819235

- **Pocket-size**

This audio amplifier is equipped with a high-sensitivity microphone that amplifies ambient sounds, enabling a hearing-impaired person to follow and take part in a discussion. In the T position, the LH10 is a receiver that picks up the magnetic fields generated by induction loops, which are used in some cinemas and conference rooms, and reproduces them in the form of an audible signal.

Maximum acoustic volume 120 dB, volume adjustment up to 30 dB.
Rechargeable lithium battery with 8 to 10 h operating time.
Weight 100 g.

Date d'impression : 09/04/2026
