RS4 transfer device

- 815238

- **Equipped with 2 removable side seats**
- **High stability during transfers**
- **Comfortable for the patient**

The RS4 allows a caregiver to transfer a patient without additional assistance and without effort. It allows the caregiver to position themselves close to the patient. By iopening the outward forks, which are operated with a simple foot pedal, it provides excellent stability. Once the patient has been lifted, the side seats can be easily positioned so that the user can rest during the transfer.
