

RS4 transfer device

- 815238

- **Equipped with 2 removable side seats**
- **High stability during transfers**
- **Comfortable for the patient**

The RS4 enables a carer to transfer a patient without external assistance and without effort. It can be positioned close to the patient. Its outward-opening forks, activated by a simple foot pedal, give it a high degree of stability. Once the patient is raised, the side seats are easy to position so that the user can rest on them during the transfer.

Large shin cushion : 39 x 26 cm.

Dimensions: width 53 / 73 x depth 82 x height. 106 cm.

Height-adjustable shin cushion 25 to 49 cm from the base.

Seat height : 62 cm (bottom) / 67 cm (top).

Maximum user weight : 185 kg.
