SALJOL ALLROUND rollator

- M - Grey - 826296GRM

- **High-quality, lightweight structure**
- **Backrest included**

The Allround rollator from Saljol has premium features. It is equipped with large, very flexible and shock-absorbing wheels to smooth out any unevenness on pathways (25 cm diameter at the front). The curb ramps are cleverly positioned to make it easier to tilt the rollator. Cork is used for the contact parts (handles, brakes, folding handles), which absorbs shocks and heat. It is UV and abrasion resistant, and remains non-slip even with wet hands. Equipped with more than 30 reflectors on the frame, tyres, and handles, the user will be visible even in the dark. The rollator brakes can be adapted for hemiplegic users with special cables provided.

Available options : walking stick holder, Jost designer bag or an umbrella.
