

Saljol carbon rollator

- M - Blue - 826297BLM

- M - Red - 826297ROM

- L - Blue - 826297BLL

- L - Red - 826297ROL

- **Ultra-light, rigid and scratch-resistant structure**

The Saljol carbon rollator offers premium features. It has large, highly flexible and absorbent wheels to smooth out any roughness on the road (25 cm diameter at the front). The sidewalk guides are cleverly positioned to facilitate tilting of the rollator. Cork is used for contact parts (handles, brakes, folding handles), absorbing shock and heat, resisting UV rays and abrasion, and remaining non-slip even with wet hands.

More than 30 reflectors on the frame, tires and handles make it visible even in the dark. The bag supplied as standard is a smart bag that can be removed with one hand. In addition to the Allround, the brakes feature an adjustable partial braking system, limiting the rollator's speed when descending.

Available options : [high-comfort backrest](#), [cane holder](#), [Jost design bag](#) ou [umbrella](#).

Overall dimensions: width 61 x depth 67 x handle height 76 to 88 cm (M) or 81 to 103 cm (L).
