Saljol Indoor rollator

- **A revolutionary ultra-stable rollator**
- **Can be used as a toilet lift aid**

The Saljol indoor rollator will be the ideal companion at home to assist with all daily activities. It's stability allows the user to lean on it whenever and wherever needed. It features two braking options: either using the handles or the central bar. It's very easy to handle and turns on the spot due to its multidirectional wheels. For added stability, the rear wheels can be locked. It is easy to drive and handle when seated on the rollator. Its removable wooden tray, covered with non-slip felt, allows meals or objects to be transported safely, while its small integrated bag allows essentials such as glasses, pill boxes or remote controls to be kept within easy reach. Its soft cork handles, which are pleasant and warm to the touch, and it’s felt-covered seat offer optimal comfort during breaks. Champagne gold colour.
