Connected light path

- 819326

- **No installation or wiring required**

This set of two interactive night lights helps keep people safer when moving around in the dark by illuminating their path. Conveniently, the two night lights are connected to each other, so when a person passes one, the other lights up as well. Easy to install, they can be attached using stickers (+ screw holes). No need for a plug or cable, they are battery-operated so they can be placed anywhere in the home. The light comes on when movement is detected within a 3-metre radius and switches off after 30 seconds.

Dimensions of each night light: 8.5 x 9.8 x 2.8 cm.
Requires 3 AA batteries, not included.
