- Size 3 - For flexible backrests - 833030.T3

- **2 kits to choose from**
- **Composed of a canvas and 2 side supports to be arranged as required**
- **Quickly repositionable supports**

The Physipro chest supports provide lateral support for the trunk, from the iliac crest to the armpit. Very effective in cases of hypotonia, it is adaptable to all existing chairs (wheelchairs or geriatrics).

Quick and easy to install:

The fabric is fixed to the backrest in tension thanks to 3 buckle straps and 4 straps in the corners. You can then position your supports at the desired height and angle. They can be repositioned at will.

Adaptable to your existing armchairs:

- On soft backrests (wheelchairs): choose the hammock effect kit because the angle of the supports is open to compensate for the deformation of the fabric. Consists of a canvas and 2 side supports. Choice of sizes.
- On rigid backrests (geriatric armchairs): choose the shaped kit with a 90° angle of the supports. Consists of a canvas and 2 side supports. Choice of sizes.

Sizes available:

- Size 1 : Width 35cm x height 40cm, suitable for a 35 to 40 cm wide chair
 - Size 2: Width 40cm x height 40cm, suitable for a chair 40 to 45 cm wide
 - Size 3: Width 45cm x height 40cm, suitable for a chair 45 to 50 cm wide
- Standard depth 16,75 or 13,75 cm on request.
