

Flexion dynamometer

- **Measuring the progress of rehabilitation**

Hydraulic dynamometer with double reading scale in kilos and pounds. Graduated scale up to 90 kg (200 pounds) with a pointer indicating the maximum recorded. This dynamometer can be used for all hand sizes thanks to its handle that can be inserted in 5 different positions, adjusting the distance from 3.5 to 8.5 cm with an increment of 1.25 cm. Supplied in a plastic case.
